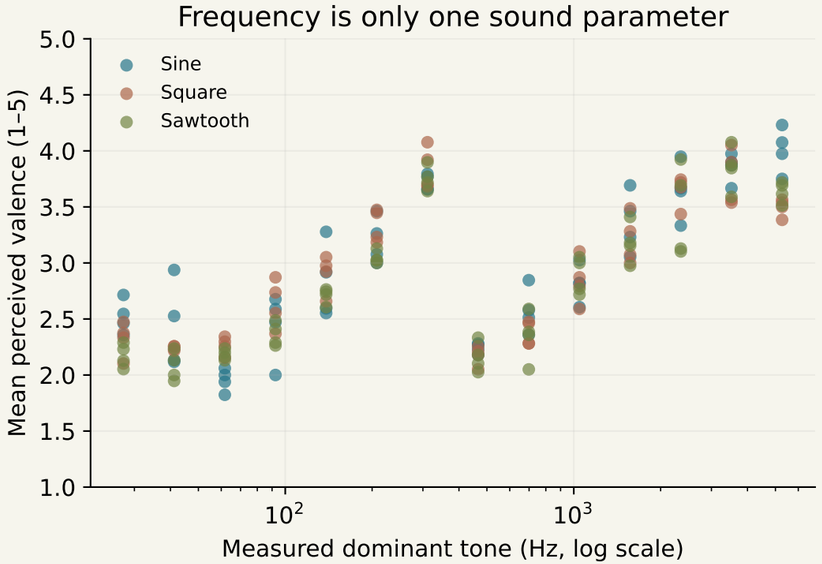
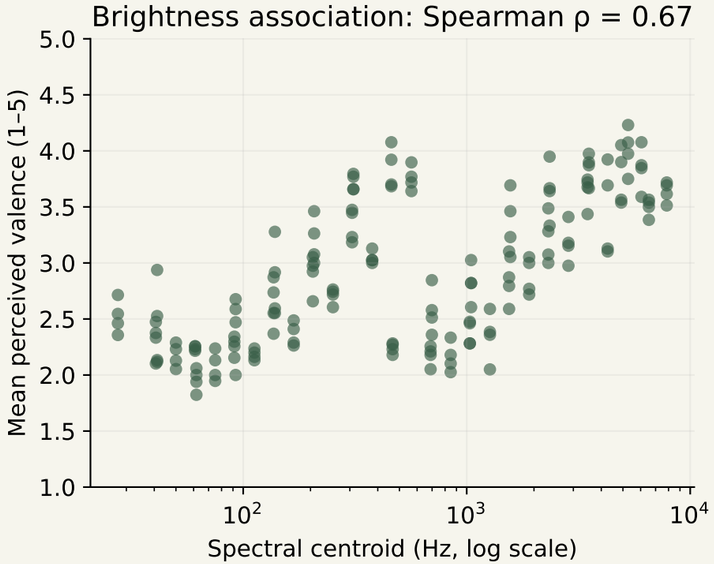
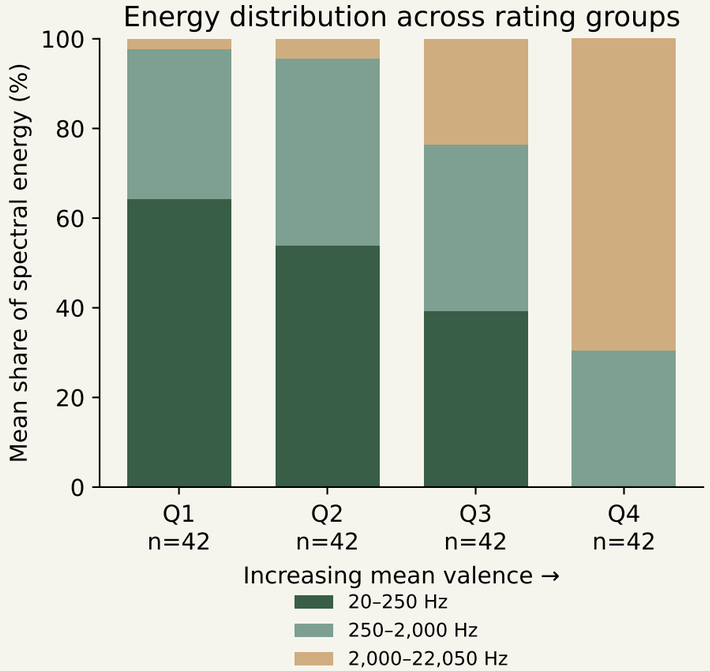
EmoSynth · 168 measured stimuli with human emotion ratings







Each point is a stimulus, not a participant. Ratings describe perceived emotion; they do not measure personal comfort, migraine relief or an optimal frequency.
Corrected Zenodo release: 168 files; the 2018 paper describes 144. Source: Baird et al., DOI 10.1145/3243274.3243277 · CC BY 4.0.
